REVENUE BRANCH.

OFFICE NOTE.

SUBJECT. Exchange of The Toti Service land of the Yemberahalli Village Devenhalli Taluk

LAST REFERENCE. Letter No. 1022 dated 17. 4. 93 from the Deputy Commissioner Bangalore District

— ,,, —

In his letter no 307 of the 7th July 1891, the Deputy Commissioner stated that Survey no 43 of the Yemberahalli Village in the Devenhalli Taluk which was granted for the Toti Service,

Could not be cultivated with wet crop owing to its situation on a higher level, and proposed the abolishment of Survey No 15 of the same Village in lieu of it, the Survey ~~Valuation~~ assessment of the lands in both Cases, being the same Viz Rs 7-8-0

2. The Deputy Commissioner was thereupon requested to report how this land which Could not be cultivated with wet crop, was classed as wet, and how it became subsequently unfit for cultivation. A sketch map shewing the

No 6253/182 dy 24-8-91.

position of this and other lands similarly situated with reference to the irrigation Channel was also called for, as it appeared from the Shakedar's report dated 23rd June 1888, that the land under notice could be irrigated from the Channel running at a distance on the northern side and that the Jotis was unwilling to utilize this Channel

No 283 dt/ 14.6.92.

3 The Deputy Commissioner reported that the lands in question and the adjacent lands were classed as wet during

the Survey Settlement which followed the old Achkat. The land in question was irrigated from the Channel to the South of it, but the water level being low temporary dams were put, and they were washed away. The Channel is said to be a field Channel irrigating wet lands, but lower down the rush of the drainage water from the neighbouring fields cut the Channel too deep, and thus rendered this and other Survey numbers unfit for irrigation purposes.

amongst the records received from the Chickaballapur Taluk to which the late Devanhalli Sub Taluk was attached.

6. The accompanying statement prepared in this office gives the particulars of the land before and after survey, and as it is clear therefrom that the land has always been a wet land now rendered unfit for cultivation, the Exchange recommended by the Deputy Commissioner may be sanctioned

Submitted for orders.

Deputy Commissioners Office.
Bangalore District
Dated 14th June 1892

To
The Chief Secretary to the Dewan
of Mysore

Sir

Referring to your docket No. 6253/182 of the 26th August last calling for further information in the matter of granting fresh lands in lieu of the one now held by the Tote of Gombrahalli village in the Devanhalli Taluk, I have the honor to state that the Amildar reports that the land in question and adjacent lands were classed, as wet, at the Survey Settlement which followed the old Atchukat. The land in question was irrigated from the channel to the South of it (shown in the enclosed sketch) but the water level being lower temporary dams were attempted which are reported

to have been washed away

2. The Channel is at its source, a field channel irrigating wet lands but lower down it receives the drainage of the neighbouring fields which is reported to have cut it too deep for irrigation purposes. 11 other surveys Nos have similarly become unfit and have been waste for 10 years or so

3. As regards the Northern Channel referred to in the Shekdars report of 23rd June 1888 the Amildar reports that it is far away from the Inam land and the branch channel opened there from for receiving water into the land is not in good order and it would cost much labor to repair it Besides the land holders of Karhalli Tank ob-ject to the utilization of water from the Northern Channel as it is not the usual source of irrigation for the land in question

4 Vernacular file is herewith

Submitted for reference and return

I have the honor to be
